

Easy-to-use file encryption solution with strong encryption for your sensitive files.

FQX file encryptor provides strong encryption to protect both internal and external file transfers, utilizing flexible authentication methods like Smart cards, Yubikeys, or strong passwords.

FQX ensures effortless implementation, allowing you to define clear data security policies. This minimizes the risk of human error and safeguards confidential information without requiring extensive user intervention.

- 1 Robust encryption and authentication**
  - Industry-standard AES-256 encryption
  - Multiple encryption methods
  - Multiple authentication methods, like Yubikeys, Smart cards, or passwords
- 2 Flexible sharing options**
  - Choose how you share your files
  - USB drivers, email, cloud storage, ...
- 3 Easy-to-use platform**
  - User-friendly graphical interface
  - Command line on MacOS, Windows, and Linux

- 4 Effortless encryption**
  - As easy as creating a .zip file - no special training required
  - Share encrypted files without needing recipients to have separate accounts
- 5 No extra meta data in the .fxq file**
  - Designed with privacy in mind
  - .fxq files contain no extra metadata beyond what's necessary, making them difficult to track or analyze
  - Minimal digital footprint associated with shared files

- 6 Directory integration**
  - Support for integration with directory services like LDAP and Active Directory
  - User authentication and permission management aligned with your organizational structure

### Benefits

**Enhanced data protection**

Control access to your files based on file sensitivity. Easily add an extra layer of security.

**Enhanced productivity**

Share files easily and fast - with security level defined by you. Define recipient access.

**Operational efficiency**

FQX simplifies user management while maintaining strict access control.

# About SSH Communications Security

SSH is the communications security company for humans, systems and networks.

Demanding organizations and enterprises in Europe, North America, and Asia trust us with their mission-critical cybersecurity.

Whether in Finance, Government, Production, Business Management, Logistics, or Healthcare, companies choose the best experts to protect their sensitive and critical data and to defend against business, compliance, and reputational risks.

We provide defensive cybersecurity solutions and related services to keep your critical sensitive data safe – whether your data is in use, in transit, or at rest.

With our proven-in-use and future-proof solutions, your data is safe in any environment.
