# SSH

COMMUNICATIONS & DATA ENCRYPTION SOFTWARE

SalaX Secure Collaboration:
Your channels for sharing confidential, restricted, or secret information

Why SalaX Secure Collaboration?

- **Avoid non-compliance and large regulatory fines** due to using unauthorized or non-compliant communication channels

- **Build authorized channels** for your sensitive information sharing and communications - instant messaging, email communications, or audio/video calls

- **Keep your data under your control** with flexible deployment on-premises, in private or public cloud

- **Allow verified-only external stakeholders to send confidential messages** to you directly from a web browser

- **Send large attachments** (up to 1GB)

- **Verify senders and recipients** with your chosen method (MFA, OTP, PIN, SSO, or bank ID)

- **Get a solid audit trail** of activities and evidence of sending/receiving communications

- **Stay protected by strong encryption** (AES-256, Olm, Megolm)

- **Choose a solution approved** by the National Cyber Security Centre Finland (NCSC-FI) for TL III (EU CONFIDENTIAL) and TL IV (EU RESTRICTED) levels for national classified information

SalaX Secure Collaboration includes:

SalaX Secure Messaging

Your secure application for real-time communications over end-to-end encrypted chats, audio and video calls. Build your own authorized channels for compliance and record-keeping - whether you deploy the solution in the cloud or on-premise.

The solution is developed by SSH Communications Security, using both the Element communications platform and the decentralized Matrix open standard for secure and interoperable communications.

It is the same technology stack as used by the French government, the German Armed Forces, NATO ACT, Sweden's Försäkringskassan, United Nations International Computing Centre and the US Department of Defense.

SalaX Secure Mail

An easy-to-use and highly secure email encryption solution that can be embedded and integrated in your existing email services to protect confidential email communications. Send and receive encrypted emails without end-user accounts or complicated maintenance.

What our customers say about SalaX Secure Collaboration:

"The solution meets our requirements for data security and data protection very well, and above all, the solution is easy to use for both the sender and the recipient.

One of the key criteria has been that the solution does not require any separate program installations from the recipient."

– Lawyer, Partner company

About SSH Communications Security

SSH is the communications security company for humans, systems and networks.

Demanding organizations and enterprises in Europe, North America, and Asia trust us with their mission-critical cybersecurity.

Whether in Finance, Government, Production, Business Management, Logistics, or Healthcare, companies choose the best experts to protect their sensitive and critical data and to defend against business, compliance, and reputational risks.

We provide defensive cybersecurity solutions and related services to keep your critical sensitive data safe - whether your data is in use, in transit, or at rest.

With our proven-in-use and future-proof solutions, your data is safe in any environment.

We offer a comprehensive portfolio of products and professional services to ensure that your organization is ready for the borderless future of cybersecurity.
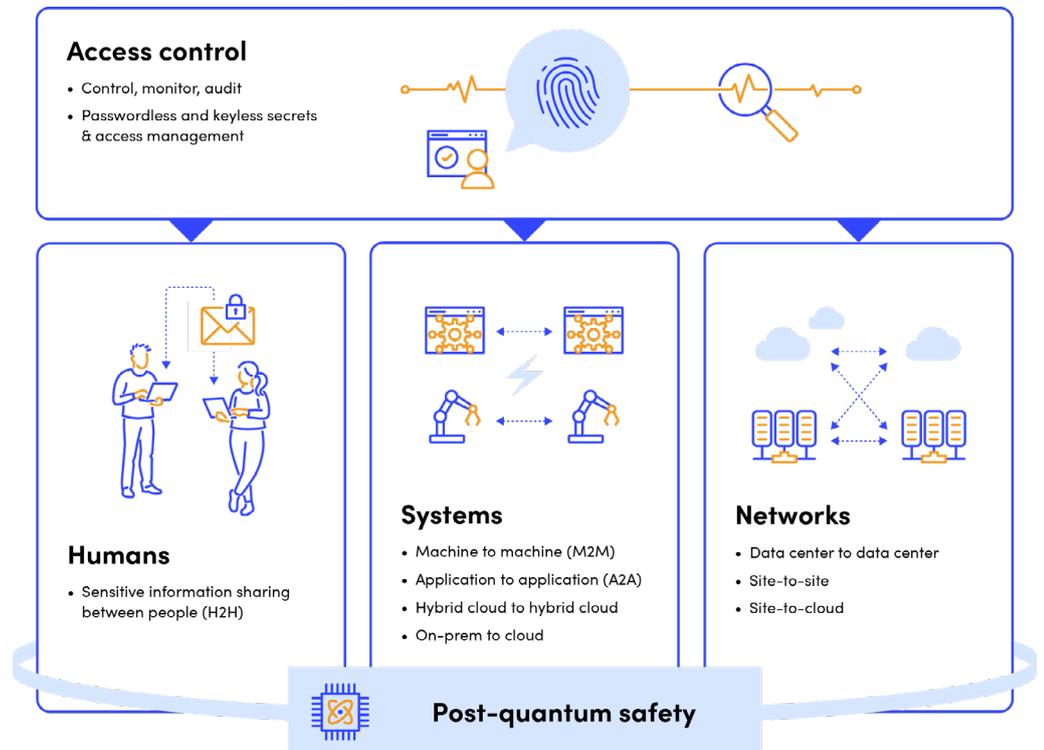

Zero Trust Suite

Zero Trust Access control.
Secure connections.
Human collaboration.

Biometric.
Passwordless.
Keyless.
Borderless.

Defensive cybersecurity.

Access control
- Control, monitor, audit
- Passwordless and keyless secrets & access management

Humans
- Sensitive information sharing between people (H2H)

Systems
- Machine to machine (M2M)
- Application to application (A2A)
- Hybrid cloud to hybrid cloud
- On-prem to cloud

Networks
- Data center to data center
- Site-to-site
- Site-to-cloud

Post-quantum safety

What our customers say about us:

"SSH is the perfect partner for us, and we work very well together. The progress we have made over the past four years has been amazing."

– IT Architect at a Global Top 10 Bank

"The users are satisfied, SSH knows what they were taking about and demonstrate experience in the field and a great understanding of our needs with their product."

– Security Architect at a European bank
